

Engage your Learners! - VQManager by SkillWise

You probably already know about VQManager, SkillWise's leading e-portfolio system that's used by thousands of learners, assessors employers and verifiers every day.

Over the last year, SkillWise has been working hard to ensure that *learners* can make more and more use of the system.

Why is it important for learners to be using an e-portfolio more?

- Learners engage better with their qualification and take a greater interest in their progress
- It saves assessors significant time if learners can help to gather evidence
- It saves centres significant cost if they can reduce the number of assessor journeys

learner's progress view

How do we encourage increased learner participation?

Easy, you actively encourage them to use their favourite interface, their smartphone.

What can the learner do with their smartphone?

- View their progress
- Submit images into their e-portfolio
- Submit video
- Submit voice recordings

evidence that has been sent to the assessor via the learner's Smartphone

Every day, new proprietary Smartphone applications are being launched to make handling images, video and sound even more efficient and easy

How do Smartphones help to prove authenticity?

Learners soon understand that adding a brief voice clip from a line manager, for instance, can provide a really strong proof of authenticity when they are submitting evidence. Furthermore, electronic evidence items such as images are automatically date and time stamped, making them very auditable.

Auditable

Putting the right tools in the learners' hands

Ultimately, we're all running more and more aspects of our lives through our Smartphones. Whether it's our diaries, our email or our social communications, Smartphones have become the stand-out tool of choice by an incredible margin.

So what better tool to put in the learner's hands, than the tool that's already there?
